Fix the leaky pipeline!

This career-building program offers female PhD students, postdocs and young scientists the opportunity to reflect on their professional situations, develop a strategy for embarking or continuing on their career paths, receive further training, and extend their personal and scientific networks. The core elements of the project are: customized further education, work in peer groups, inter-institutional cooperation, and an interdisciplinary network. The aim, actively supported by the ETH-Domain, is to support women in their scientific careers and in the process to fix the “leaky pipeline” of women in science.

Concept of the program

The program started with an Information event in September 2010. 8 coaching groups and min. 9 course modules took and took place between October 2010 and April 2012.

ETH-Domain’s Group of Equal Opportunities for women and men
Fix the leaky pipeline!

Career Café

Academic Pipelines in Science and Technology:
Meet successful women with academic backgrounds in these fields
• How do established women professors account for their success?
• What were their strategies?
• How important is plan B?
• What are attractive options and how important is it to keep them open?

Goals
Your chance to ask questions you have always wanted to ask and hear ideas you haven't yet thought about!

Method
World Café technique (adapted): Small-group discussions with top women in professorships and managerial positions.

Language
The event will be held in English.

Participants
The event addresses women with a PhD-degree or near to completion of one. The number of participants is limited to 60 persons.

Moderation
Dr. Pamela Alean-Kirkpatrick, alean-academics, Eglisau

Fix the leaky pipeline
