Fix the leaky pipeline! A career-building program for women in science

Event

“Academic careers for women”

22 March 2018  9h45-16h
SERI, Berne

This program offers scientific women the opportunity to reflect on their professional situations, to develop a strategy for embarking or continuing on their career paths, to receive further training, and to extend their personal and scientific networks. The aim is to support women in their scientific careers and in the process to fix the “leaky pipeline” of women in science.

The core elements of the project are coaching groups with peers, customized courses, inter-institutional cooperation and interdisciplinary networking events.

To launch the 2018 program, a panel discussion on “Academic careers for women” with guests from ETH institutions is organized in Berne.
