# Fix the leaky pipeline!

A career-building program  
for women in science

## Event

“Academic careers for women”

March 18, 2019, 9h45-15h30  
Uni Bern, Kuppelraum

This program offers scientific women the opportunity to reflect on their professional situations, to develop a strategy for embarking or continuing on their career paths, to receive further training, and to extend their personal and scientific networks. The aim is to support women in their scientific careers and in the process to fix the “leaky pipeline” of women in science.

The core elements of the project are coaching groups with peers, customized courses, inter-institutional cooperation and interdisciplinary networking events.

To launch the 2019 program, a panel discussion on “Academic careers for women” with guests from ETH institutions is organized in Berne.
